

Cynet's Email Security

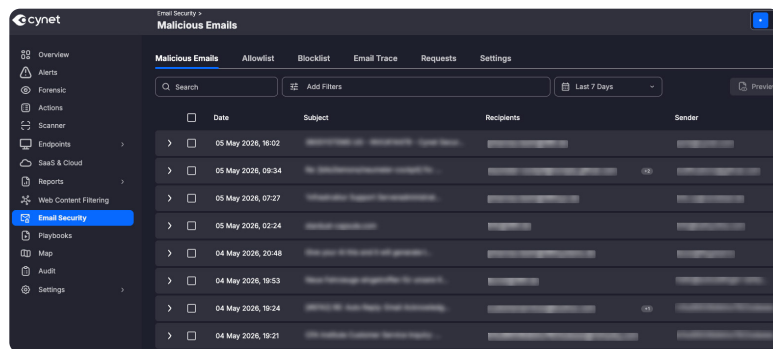

Smarter Email Protection. Built for the Speed of Business.

Unify Your Defenses. Amplify Your Detection

94% of malware arrives via email, and with AI now powering more convincing phishing lures and business email compromise campaigns, BEC alone cost organizations \$3 billion in 2025, losses that traditional email gateways and native cloud filters were never built to stop.

Cynet Email Security is different because it doesn't operate in isolation. Built natively into Cynet's unified, AI-powered platform, it combines advanced threat detection with CyAI behavioral analysis and 24x7 CyOps expert oversight to catch what standalone email tools miss. By correlating email signals alongside endpoint, identity, and network telemetry in a single platform, Cynet detects spoofing, analyzes embedded URLs in real time, and automatically remediates malicious emails before they reach the inbox, giving lean security teams enterprise-grade email protection without adding another tool to manage.

Protection Across Email Environments

Cynet Email Security protects Microsoft 365, Google Workspace, and other cloud email gateways with always-on detection, prevention, and automated response.

AI-Driven Threat Detection

Identify phishing, spoofing, and BEC attempts in real time using CyAI trained on millions of samples.

Attachment Scanning

Detect and block malicious attachments, including zero-day threats.

URL Scanning & Link Protection

Analyze links before and after delivery to prevent credential theft and redirects.

Policy-Based Controls

Configure rules for quarantine, tagging, and user notifications in the Cynet console.

Quarantine & Review

Automatically isolate suspicious emails with full admin review and release control.

Allow & Block Lists

Manage trusted and restricted domains, senders, and file types.

External Sender Tagging

Flag external emails to help identify phishing attempts.

Automated Response & Remediation

Remove malicious emails automatically and notify admins instantly.

How Cynet Protects Email

Unified, AI-Powered Protection

Unlike gateways or point tools, Cynet integrates email protection into a single unified platform.

Rapid Deployment. No Complexity.

Cynet's cloud-native Email Security integrates seamlessly with existing environments. Deployment takes minutes with no impact on performance or workflow.

Human Expertise Built-In

Cynet's 24x7 CyOps MDR team monitors threats in real time, investigating and isolating users or disabling accounts to stop BEC fast.

The Cynet Advantage

CAPABILITY	TRADITIONAL EMAIL GATEWAY	CYNET EMAIL SECURITY
AI & Behavioral Detection	Limited, rule-based	Advanced CyAI analysis across millions of signals
Unified XDR Correlation	None	Native integration with endpoint, user, identity, and network telemetry
Automated Remediation	Manual	Fully automated with SOAR playbooks
24x7 MDR Support	Add-on cost	Included with CyOps
Response Speed	Delayed	Sub-second detection and containment
Coverage	Email only	Complete protection across the entire environment

Fewer phishing and BEC incidents.

Faster Remediation: AI-powered. Human verified.

Reduced false positives and alert fatigue.

Simplified Compliance with audit-ready visibility.

Unified reporting across all threat vectors.

Experience Email Security That Works

With AI precision and human expertise. Cynet delivers unified protection. Cynet Email Security is part of the Cynet Unified, AI-Powered Cybersecurity Platform, covering endpoints, users, networks, identities, cloud, and mobile from a single pane of glass.

Cynet empowers MSPs and security teams to scale and profitably deliver enterprise-grade cybersecurity with a unified, AI-powered platform covering endpoints, users, networks, identity, cloud, email and more. Backed 24x7 by CyOps MDR security experts, Cynet automates detection, response, and remediation so defenders can protect more clients, reduce overhead, and deliver stronger security outcomes with less effort.

About Cynet

Cynet's Unified, AI-Powered Cybersecurity Platform unifies a full suite of security capabilities on a single, simple solution, backed by 24x7 expert support. Cynet is purpose-built to enhance protection for small-to-medium enterprises and to maximize margins for MSPs.
