

Cynet's Security Orchestration, Automation, and Response (SOAR)

Automate, Orchestrate, and Respond from a Single, Unified Platform

Resolve Threats 50x Faster.

Reduce Manual Incident Handling by 90%

Because Cynet unifies data from every layer of your environment into a single platform, CyAI can automatically correlate signals, determine root cause, and trigger response in seconds. This is what makes Cynet's built-in SOAR fundamentally different from bolted-on alternatives; there's no data hand-off, no integration overhead, and no delay between detection and action.

Eradicate Attacks Before Damage is Done:

With CyAI processing telemetry across all vectors in one platform, Cynet uncovers and resolves all attack components across your environment in seconds.

Increase Operational Efficiency:

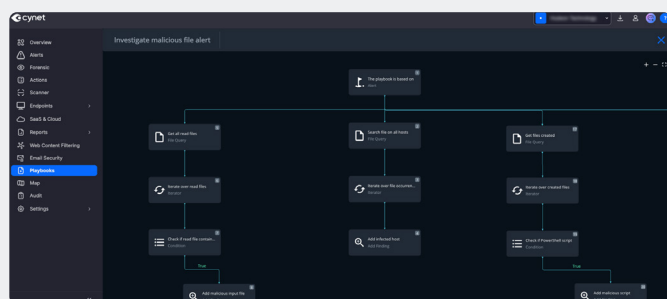

CyAI's automated correlation and root cause analysis eliminates manual triage, accelerating detection, investigation, and response without added headcount.

Enhance Response Skills:

Boost IT and security team expertise with AI-powered investigation and response workflows, built from years of CyOps MDR experience.

Reduce Cost and Complexity:

Avoid the costly, resource-intensive implementation and support of a complex third-party SOAR system.

Cynet SOAR

Modern attacks move fast. Manual response slows you down. Unlike standalone SOAR tools that require complex integrations across disconnected data sources, Cynet's SOAR is natively built into the unified platform, giving CyAI a single, continuous view of your entire environment to automate every step from investigation through remediation, so you can contain threats in seconds, not hours.

Integrate:

Incorporate third-party log data into investigation flows and extend remediation to IT components like switches, firewalls, Active Directory, and more.

Investigate:

Automatically determine root cause and full scope of an attack. Includes a graphical timeline, layout, and automated investigation and response actions.

Consolidate:

Investigate alerts, remediate threats, and automate incident response workflows—all from a single pane of glass.

Orchestrate:

Cynet Remediation Playbooks automate multi-action responses for any attack scenario. Use prebuilt playbooks or create custom ones with the drag-and-drop Playbook Editor.

Remediate:

Eliminate malicious activity across endpoints, networks, users, SaaS applications, and other IT components with the broadest set of remediation actions available.

The Cynet Advantage

Unified Platform

SOAR is natively built into the Cynet platform, no extra integrations or licenses required.

Pre-Built Playbooks

Automate complex multi-stage responses with proven, ready-to-use playbooks.

Expert-Led Guidance

Every action is backed by CyOps 24x7 MDR security experts, ensuring complete accuracy and control.

AI-Driven Correlation

CyAI connects signals across endpoints, users, email, network, and cloud for instant clarity.

Complete Visibility

Investigate, orchestrate, and automate from a single pane of glass.

Automate the Response. Own the Outcome.

Standalone SOAR tools promise automation but deliver complexity. They require dedicated integrations, ongoing maintenance, and skilled resources just to stay operational, which is precisely the overhead lean security teams cannot afford. Cynet's built-in SOAR eliminates that burden entirely. Because it is natively part of the same unified platform as your endpoint, network, identity, email, cloud, and SaaS protection, every playbook runs with full environmental context, and every response action takes effect in seconds, not hours.

Cynet empowers MSPs and security teams to scale and profitably deliver enterprise-grade cybersecurity with a unified, AI-powered platform covering endpoints, users, networks, identity, cloud, email and more. Backed 24x7 by CyOps MDR security experts, Cynet automates detection, response, and remediation so defenders can protect more clients, reduce overhead, and deliver stronger security outcomes with less effort.

About Cynet

Cynet's Unified, AI-Powered Cybersecurity Platform unifies a full suite of security capabilities on a single, simple solution, backed by 24x7 expert support. Cynet is purpose-built to enhance protection for small-to-medium enterprises and to maximize margins for MSPs.
